Reimagining the Corporate Actions Operating Model Key survey findings

Reimagining the Corporate Actions Operating Model

Overview

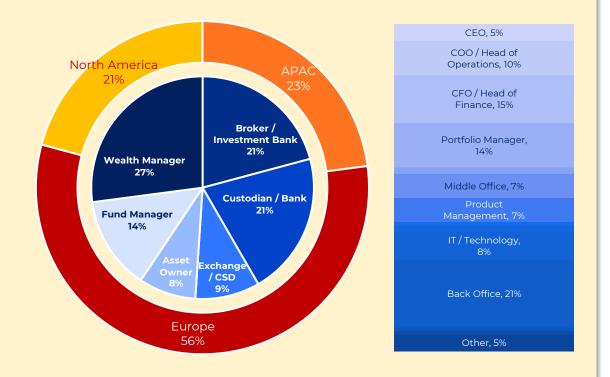

In May / June 2022, the ValueExchange launched an industry-wide benchmarking campaign to map out how the corporate actions operating model is evolving in 2022 with the support of S&P Global Market Intelligence and ISSA (the International Securities Services Association)

This document summarises the key statistical findings of our campaign so far. All of the data in this Key Findings document is drawn from our interactive data dashboard. Please contact us if you would like to explore this data yourself.

We would love to hear your reactions to these findings and so please reach out if you have any comments or questions (to info@thevalueexchange.co)

Who participated in our campaign?

As a truly industry-wide survey, we have benefited from the insights of over **114 organisations across the corporate actions lifecycle globally**. These respondents are broken down as follows:

Reimagining the Corporate Actions Operating Model: Key Findings

Reimagining the Corporate Actions Operating model

Today's operating model		Why are we struggling to scale?	Driving scale in corporate actions
\$5m	The average cost of running a regional corporate actions unit	70% Of us are manually validating custodian feeds	30% Improvements in STP from ISO2022
17%	Average expected cost growth in corporate actions	7 Corporate action data sources kept and validated by hand	40% Improvement in volume/cost efficiency from outsourcing
45%	Brokers experiencing errors of >USD1m in 2021/2022	50% Of manual intervention is for voluntary events	0% Errors over USD5m, for those outsourcing their event data

How much do corporate actions cost us?

Corporate actions are a USD3-5m business for each of us

All figures given are for a regional corporate actions department (e.g. North America, EMEA or Asia-Pacific)

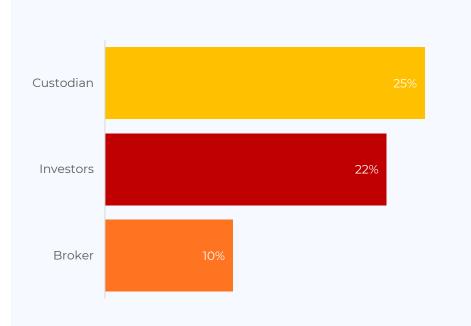

Who is seeing the growth?

Investor-led expansion is hitting all of our key markets

29% 21%

Average volume growth (of securities) by region

Average volume growth (of securities) by segment

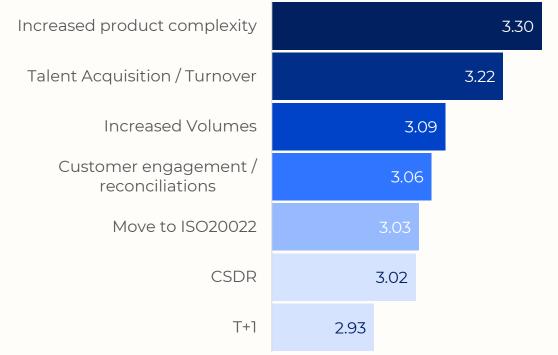

benchmark :ommunit thevalueexchange.cc

How are we scaling today?

Complexity, talent and volumes as the hotspots

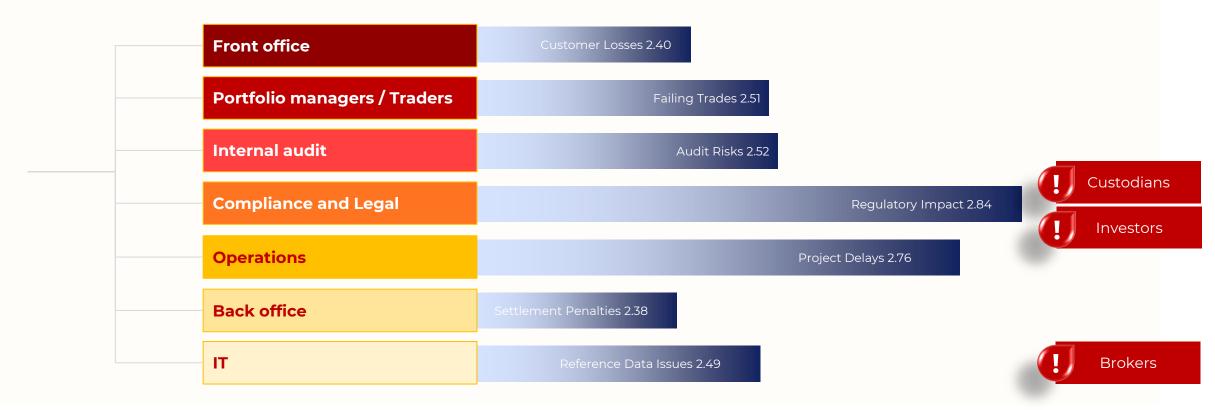

Key Challenges in driving corporate actions scale in 2022 (Out of 5)

How are we scaling today?

Issues are being felt across the organisation

Impact of corporate actions data errors over the past 24 months (out of 5)

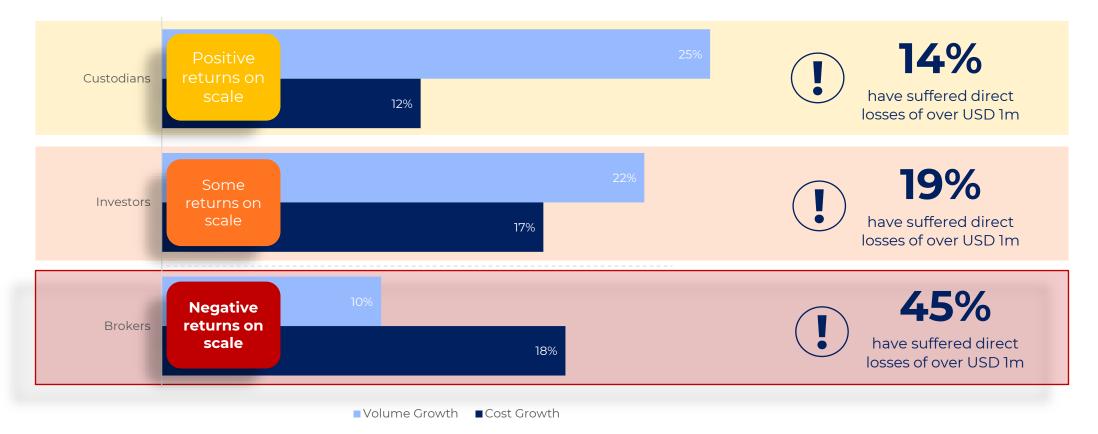

How are we scaling today?

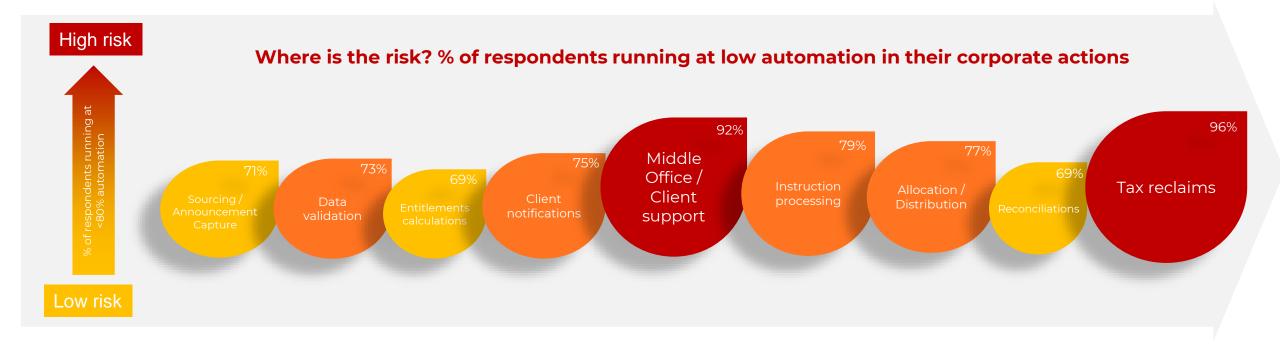

...brokers are struggling to scale most of all

Volume vs Cost Growth (by segment)

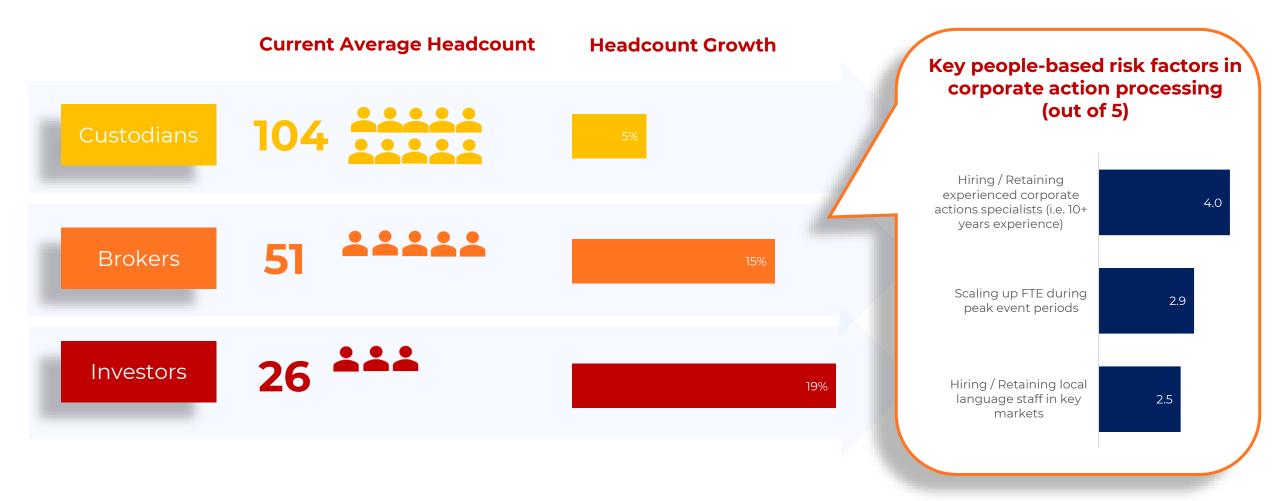

We're not ready to scale: Key weak spots persist across the event lifecycle

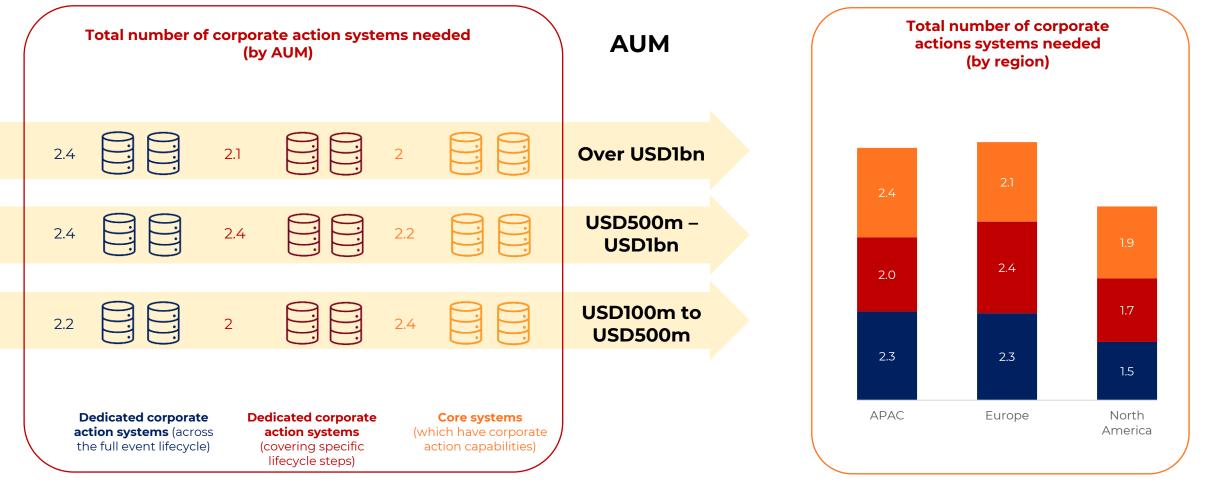

A huge hiring challenge – but is it achievable?

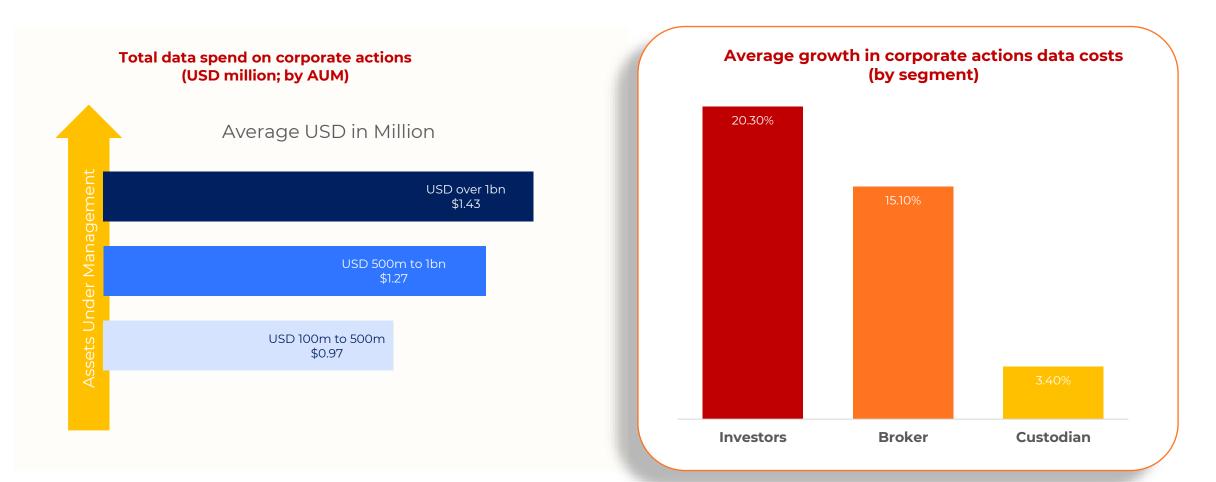

All figures given are for a regional corporate actions department (e.g. North America, EMEA or Asia-Pacific)

Highly factionalised infrastructures for all – and a hidden cost of localised market practices

Why are we struggling to scale? Data costs are a core variable - and are rising fastest

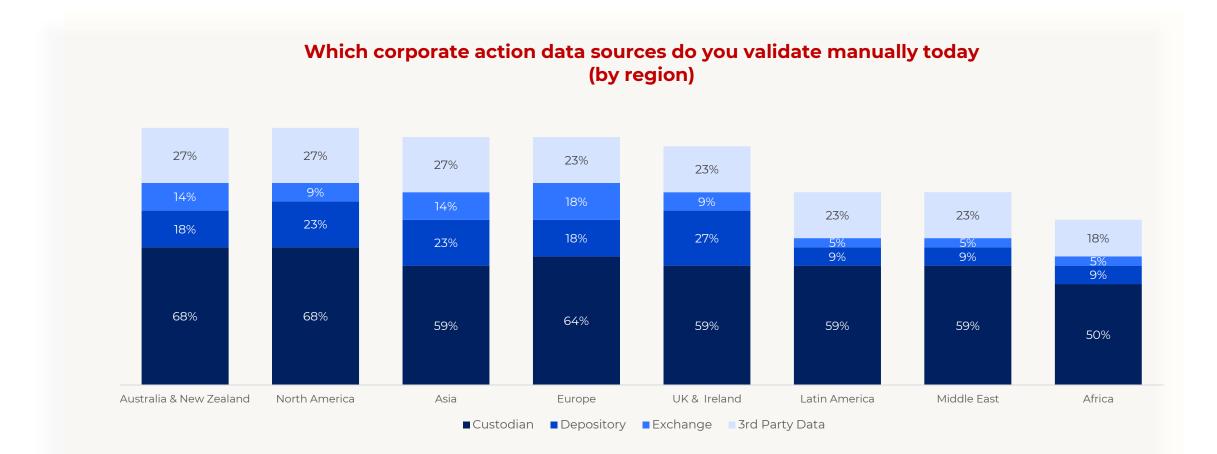

Why are we struggling to scale? So much data yet 75% of us are re-validating it manually

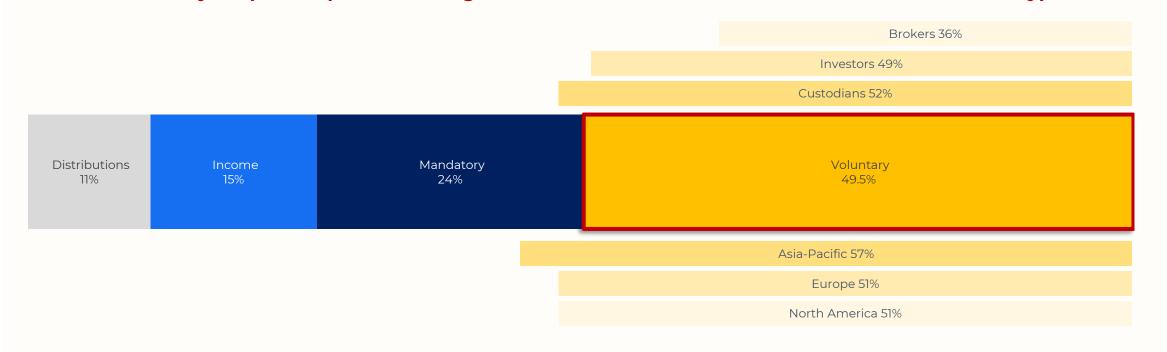

Impact community thevalueexchange.co

...and the manual validation is highest in our growth markets

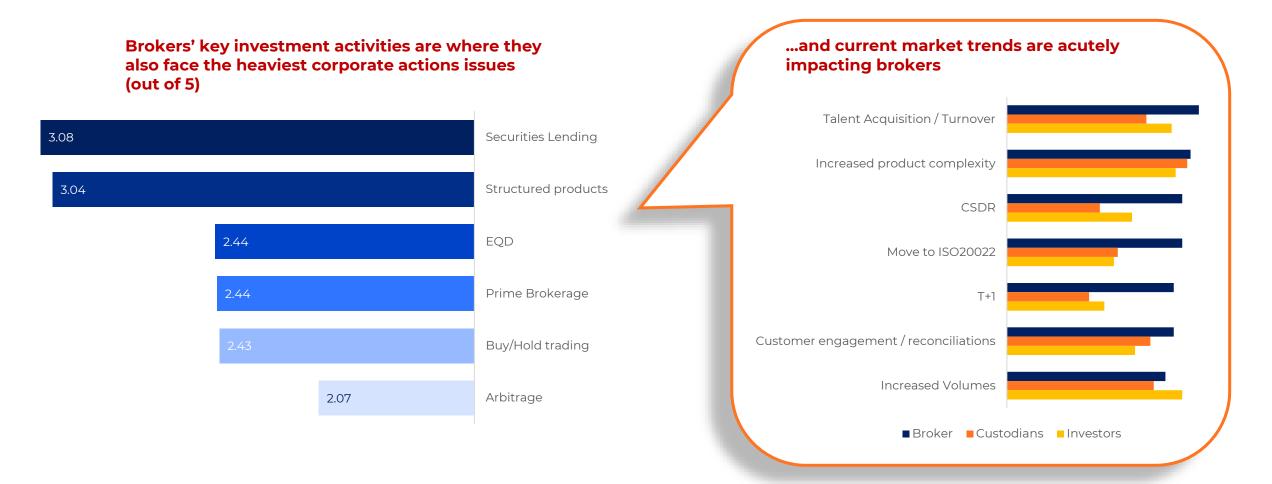

Why are we struggling to scale? Voluntary events are the core of our manual burden

How is your (manual) data sourcing and validation effort distributed across different event types?

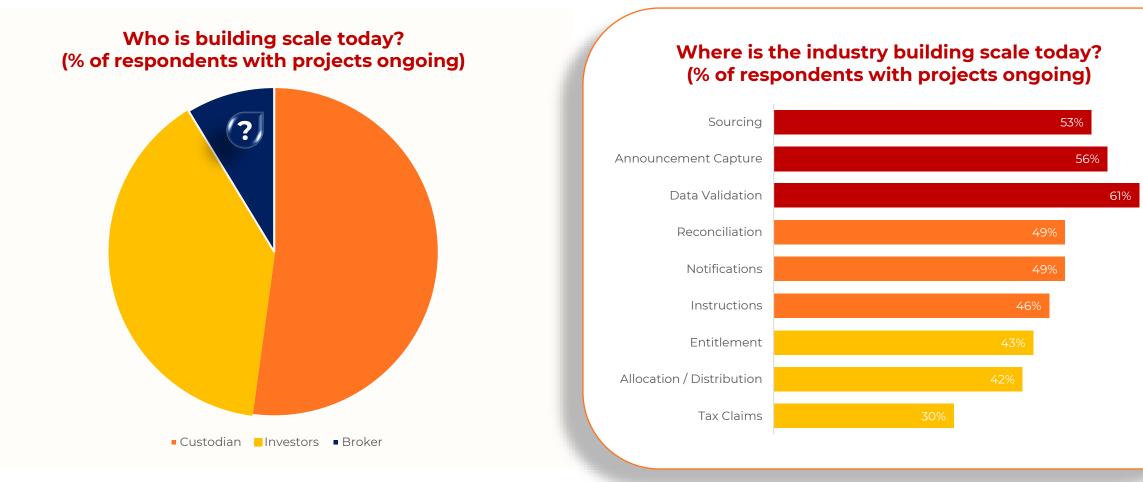

Brokers are in the eye of the storm

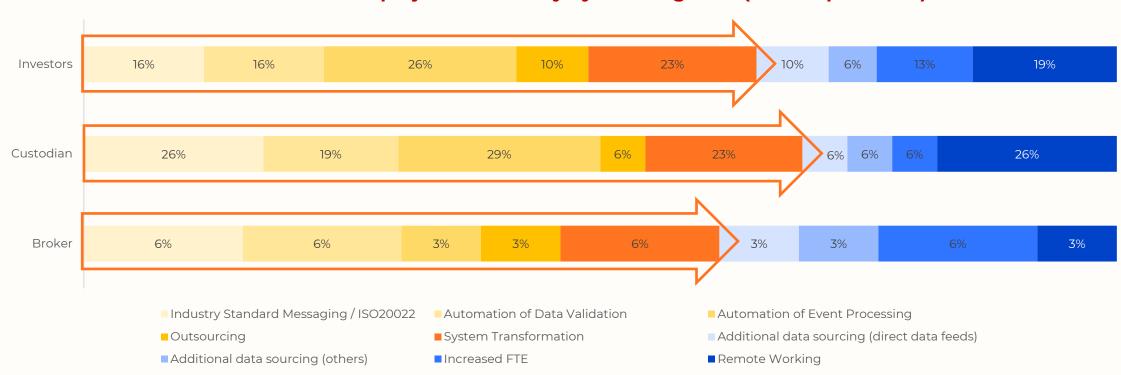

How are we building scale today?

Custodians and Investors continue to focus on data processing. Where are the brokers?

How are we building scale today?

Are we transforming or surviving?

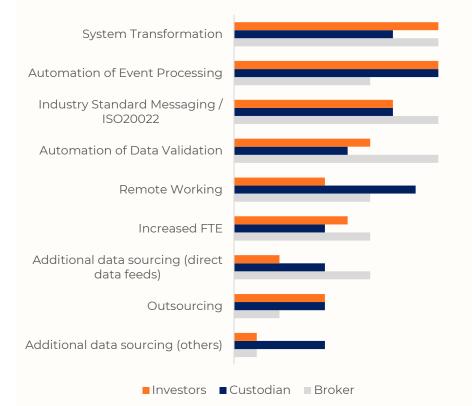

Transformational projects underway by each segment (% of respondents)

How are we building scale today?

Automation and technology in data management

Where are we focusing our projects (Ranking of projects per segment)
